Our shutoffs

Where each one is, and who can use it.

Gas

Shut it off only if we smell gas, hear it, or see damage, and only if it is quick and safe. Only the gas company turns it back on.

The meter and valve are at

The wrench is kept at

Who can shut it off

☐ We took a photo of it

Water

A round handle turns clockwise to close. It may take many turns.

The main valve is at

The tool, if one is needed, is at

Who can shut it off

☐ We took a photo of it

Electricity

The main breaker is at

Which panel, if we have more than one

Who can shut it off

☐ We took a photo of it

Our power service comes in

stay at least 30 feet from a downed line

☐ Overhead ☐ Underground

Gas company leak line

Water utility line

IF WE RENT

We write down the shutoffs we can reach in our own unit, like the valves under sinks and the gas appliance shutoffs.

Our unit shutoffs are at
